Context

64% of Filipino households own pets, yet only 22% of dogs get regular veterinary care.

Problem Statement

Problem

Pet care is fragmented , making it difficult for owners to track health records , monitor behavior , and access trusted products.

Impact

Pet owners face missed care and stress, clinics suffer from inefficiencies, and shelters struggle with managing medical histories.

Problem Statement/Industry

Problem Being Solved

Pet owners face challenges in maintaining pet health and safety due to limited awareness, difficulty monitoring risks, and lack of reliable information, leading to preventable health issues and safety concerns for pets and people.

Supporting Data

64% of Filipino households own pets, yet only 22% of dogs get regular veterinary care.

Problem Analysis

Affected Stakeholders

Pet owners are directly affected, as they often struggle to monitor their pets' health, track vaccination schedules, manage female pets' reproductive cycles, and access trusted products. Busy schedules and fragmented services can lead to missed appointments, delayed care, or stress for both pets and owners.

Impact on Stakeholders

Pet owners face stress and delays in pet care due to fragmented health tracking and transport challenges. Veterinary clinics experience scheduling inefficiencies, while shelters struggle with adoptions. Pet transport providers face logistical and safety issues. Together, these problems reduce pet well-being and strain the pet care ecosystem.

Root Causes

Fragmented records, reliance on physical documents, lack of automated reminders, and decentralized health tracking systems.

Personal/Team Connect

As a team, we are passionate about solving the stress of fragmented pet care. Having experienced the struggle of managing health records firsthand, we want to simplify pet parenting through a centralized digital platform.

Target Customer Segments

Primary

Pet owners aged 20-40
with busy schedules.

Secondary

Small to medium
veterinary clinics and
animal shelters

Customer Segment & Persona

Primary Segment

Pet owners aged 20-40 with busy schedules.

Secondary Segment

Small to medium veterinary clinics and animal shelters

Interests/Hobbies: Gaming and Entertainment

Primary Source of Information: Social Media

Shopping Preference: Mostly Online

Comfort with Technology: High

Favourite Social Media: Tiktok and Instagram

Favourite Offline Gathering Spots: Mall

Jobs-to-be-Done

Functional JTBD

Store and access pet medical records, track health events, and receive reminders for vaccinations and medications.

Emotional JTBD

Lessen the stress by visiting the vet clinics.

Social JTBD

Be seen as a responsible and prepared pet owner by vets/family because appointments are organized and timely.

Current Alternatives

Current Alternatives

He relies on saving photos of records on his phone, using manual notes and reminders, and keeping physical paper cards.

Gaps in Current Alternatives

Pet owners feel that current solutions are disorganized and unreliable over time, as records are scattered across photos and paper, making them difficult to find when urgently needed. These improvised methods lead to wasted time, missed appointments, and high stress during vet visits.

Our Solution

Solution

PawsomeCare – An AI-powered app that consolidates digital pet passports, behavioral tracking, and a vet-approved marketplace into one platform.

Core Technologies/ Methodologies

Our solution uses Flutter for the mobile app, HTML for the clinic's web dashboard, and Python to manage the backend data and health tracking.

Solution Design

Our Solution

PawsomeCare – An AI-powered app that consolidates digital pet passports, behavioral tracking, and a vet-approved marketplace into one platform.

Key Features

Our pet health ecosystem features smart life-cycle tracking, digital storage for ownership and medical documents, real-time data syncing between owners and clinics, and smart health reminders.

Uniqueness

Our solution is a unique, all-in-one ecosystem that replaces fragmented paperwork with a single, data-driven source of truth shared by both owners and clinics in real-time.

Solution Format:

Digital service

Core Technologies/ Methodologies:

Our solution uses Flutter for the mobile app, HTML for the clinic's web dashboard, and Python to manage the backend data and health tracking.

Solution Benefits

Functional Benefits

Access 24/7 digital health records, catch illnesses 3 days earlier with AI alerts, reduce vet consultation time by 50%, and avoid unsafe products via automated allergy filtering.

Emotional Benefits

Peace of mind from early health alerts, confidence in making vet-approved choices, and the security of knowing my pet's medical history is always safe.

Social Benefits

Recognition as a top-tier responsible pet owner, praise from veterinarians for providing precise data, and a sense of belonging in a community of tech-forward animal lovers.

Macro Benefits

Boosts pet welfare via early disease detection, cuts emergency costs, reduces abandonment, eliminates paper waste, and grows the local economy by supporting ethical vet-approved businesses

Competitors

Direct

Pettr (PH), PetNoter, Medika, and local vet-specific patient portals.
PetDesk, 11pets, Whistle, FitBark, and PetPace.

Indirect

Generic note-taking apps (Evernote), Facebook pet communities, and manual paper medical booklets.
Telehealth platforms (Pawp, Airvet), Rover, and the American Red Cross Pet First Aid app.

Our UVP

Our platform uniquely combines pet monitoring, vet services, and pet shopping in one app, saving pet

Macro Analysis

Favourable Trends

AREA	DESCRIPTION
Technology	AI now identifies micro-shifts in behavior to detect pet illnesses 3-5 days before symptoms appear.
Social	Owners treat pets as family, prioritizing premium wellness and proactive, vet-approved care.

Unfavourable Trends

AREA	DESCRIPTION
Economy	High costs for vet services and supplies are forcing owners to trade down to budget alternatives.
Demographics	Urban housing restrictions and limited space are leading to lower pet ownership among young adults.

Data Sources:

Prototype

Prototype Format

A digital app prototype built in Figma pr as interactive mobile interface simulation

Functionality included in the Prototype

Includes login, user dashboard, pet profiles, ai behavioral tracking, vet-approved marketplace, a clinic list, pet adoption and a digital health dashboard.

Functionality NOT included in the Prototype

live payment processing and advanced real-time adoption verification systems.

Prototype Validation

Number of users engaged with?

10

How many people liked or loved the prototype?

10

How many people were either neutral or mostly unhappy with the prototype?

0

Prototype Feedback

What aspects of the prototype did the users LOVE?

Users loved the 'all-in-one' nature of the prototype, noting that it eliminates the need to switch between different apps for shopping and health monitoring. They also highly praised the UI design, specifically the intuitive icons and clean layout that made complex data easy to understand.

What aspects of the prototype were DISLIKED by the users?

Users were overall very positive, with no dislikes regarding functionality. The only neutral feedback involved the UI color scheme, with one user suggesting a more refined palette. We categorized this as a minor aesthetic preference that does not impact the app's core utility.

Competition Analysis

COMPETITOR NAME	TYPE	STRENGTHS	WEAKNESSES
Pettr(Petpal)	Direct	Made for PH, G-cash ready, quick ai	Buggy app, messy interface
11pets	Direct	deep health logs, easy sharing	No local info, hard to learn,
PetDesk	Indirect	auto-reminders, direct vet sync	Boring design, no marketplace
Rover	Indirect	Trusted & safe, easy booking	no health tech, high prices

Our Product/Service will be better than the competitors' solutions because:

We provide an all-in-one app with AI behavioral tracking, a digital health dashboard, and a direct network of local vets and shops.

Revenue Models / Pricing

Revenue Model (Primary)

Subscription Model

Revenue Model (Secondary)

Subscription Model

Lean Canvas

Go-to-Market Approach

Geographic Focus

Focusing on Metro Manila (specifically Pasig and Mandaluyong) due to the high density of pet clinics and wealthy pet owners, with plans to expand to other urban hubs like Cebu City.

Digital Marketing Channels

Facebook Ads, Instagram, TikTok, Email Marketing, SEO

Physical Marketing Channels

Pop-up displays, Flyers, Pet Expos and Trade Shows, Event Sponsorships, Direct partner referrals(brochure)

PRIMARY CUSTOMER SEGMENT
Pet owners aged 20-40 with busy schedules.

UVP

Our platform uniquely combines pet monitoring, vet services, and pet shopping in one app, saving pet

Marketing KPIs

CAC measures marketing efficiency. Conversion Rate tracks QR sign-ups. Churn monitors retention. Activation ensures QR Passport completion. Revenue Growth tracks monthly subscription income.

Competitors' GTM

Local Vets excels at signage/trust but fails at digital sync. Global Apps uses ASO/SEO well but lacks local QR. Retailers uses influencers but has no AI tracking.

GTM Partners

Local Vet Clinics for lead generation; Pet-fluencers for content; LGUs for mass awareness; and Pet Retailers as affiliates to drive premium signups via QR referrals.

Sales & Customer Service

Customer Service

In-app AI chatbot for 24/7 support; Messenger and WhatsApp local queries; Email for technical issues; and Help Center on the website for QR Passport and AI troubleshooting.

Distribution Channels

We will use Direct Digital Distribution through a mobile application and web platform, allowing pet owners to subscribe, access pet monitoring features, book clinic services, and purchase pet products

Digital Sales Channels

Google Play Store and App Store for premium subscriptions; Facebook and Instagram Shop for QR Passport Kits; and the PawsomeCare Website for direct clinic-partner registrations.

PRIMARY CUSTOMER SEGMENT

Pet owners aged 20-40 with busy schedules.

UVP:

Our platform uniquely combines pet monitoring, vet services, and pet shopping in one app, saving pet

Physical Sales Channels

Partner Vet Clinics in Pasig/Mandaluyong; Pet Retailers; Local Pet Expos; and LGU-led Community Vaccination Drives for on-site QR Passport signups.

Sales KPIs

MRR tracks subscription income; QR-to-Subscriber Conversion Rate measures marketing effectiveness; CAC per clinic monitors acquisition costs; and Partnership Retention tracks clinic loyalty.

GTM Partners

Digital: CSAT after QR scans, NPS for premium users, and App Store reviews.
Offline: In-depth interviews with partner vets and feedback cards at clinic QR standees.

Php 770,179

Break-even Month

Month 3

Next Steps

Goals for Months 10-12

Reach 7,268 users and
stabilize profit margins

Goals for Months 4-6

Reach break-even and
optimize AI behavioral
model

Goals for Months 7-9

Partner with 5 clinics
and add behavior
tracking

Goals for Months 1-3

Launch MVP and
acquire first 250
subscribers

Venture Viability Assessment

Venture Viability Index 88.88%

Strengths

Our primary strengths are high operational efficiency and a strong revenue trajectory. We reached break-even early in the first year, proving our model is self-sustaining. Our low acquisition costs compared to high customer lifetime value allow us to scale profitably. Our AI-driven technical foundation also ensures a high-value, scalable product.

Areas of Improvement

We must address high initial setup costs and non-operating expenses that impacted our first-year net income. Our focus needs to shift from infrastructure spending to long-term maintenance and improved customer retention. We also plan to optimize our monetization strategy for new features to ensure a faster transition into full profitability.

Next Steps

TIMELINE	GOALS	TEAM NEEDED	PHYSICAL RESOURCES NEEDED	FUNDS NEEDED
Months 1-3	Launch MVP and acquire first 250 subscribers	Core team	Dev tools	Php150,000
Months 4-6	Reach break-even and optimize AI behavioral model	Support	AI Server	Php250,000
Months 7-9	Partner with 5 clinics and add behavior tracking	Sales	Cloud DB	Php300,000
Months 10-12	Reach 7,268 users and stabilize profit margins	Data Lead	Office	Php200,000

Venture Summary

OVERVIEW

We at PawsomeCare are dedicated to enhancing the well-being of pets by providing innovative AI-driven tools that track health and behavior. Currently, we are developing a digital ecosystem that uses machine learning to offer personalized insights into a pet's emotional and physical needs. By bridging the gap between owners and their companions through accessible technology, we aim to foster more responsible pet care and ensure every animal lives a healthier, more understood life.

Mission

Our mission is to empower pet owners through accessible AI technology, providing personalized health tracking and emotional insights for every pet. We strive to simplify pet care by bridging the gap between data and daily well-being, ensuring our companions live healthier, longer lives through innovative and scalable digital solutions.

Social/Economic Relevance

Responsible pet care reflects a compassionate society, yet many owners struggle to understand a pet's silent needs. By solving this, we prevent animal suffering and ease the burden on veterinary systems. Strengthening the human-animal bond improves community well-being, fostering a more empathetic and humane future for everyone.

Thank You!

Our mission is to empower pet owners through accessible AI technology, providing personalized health tracking and emotional insights for every pet. We strive to simplify pet care by bridging the gap between data and daily well-being, ensuring our companions live healthier, longer lives through innovative and scalable digital solutions.
